

Create a Twitter Developer account and obtain the “Consumer Key” / “Consumer Secret” / “Access Token” / “Access Token Secret”

1. Join the Twitter Developer Community [[Click here to go](#)] > Click on [Join](#)

2. You need to enter the following information to register:

Join the community

Join our community for the latest news, product updates, and events from the TwitterDev team.

First name*

Last name*

Email address*

Twitter username*

City*

Country*

[Sign up now](#)

3. Click on **My apps** to go to the portal where you can create your apps:

4. Choose **Create New App**:

5. You give a brief description of your project, and accept the Developer Agreement then click on **Create your Twitter application**:

Create an application

Application Details

Name *

Your application name. This is used to attribute the source of a tweet and in user-facing authorization screens. 32 characters max.

Description *

Your application description, which will be shown in user-facing authorization screens. Between 10 and 200 characters max.

Website *

Your application's publicly accessible home page, where users can go to download, make use of, or find out more information about your application. This fully-qualified URL is used in the source attribution for tweets created by your application and will be shown in user-facing authorization screens.
(If you don't have a URL yet, just put a placeholder here but remember to change it later.)

Callback URL

Where should we return after successfully authenticating? OAuth 1.0a applications should explicitly specify their oauth_callback URL on the request token step, regardless of the value given here. To restrict your application from using callbacks, leave this field blank.

Developer Agreement

☐ Yes, I have read and agree to the [Twitter Developer Agreement](#).

Create your Twitter application

Note that you need to have your Twitter account activated using a phone number to continue to the next set.

You can go to <https://support.twitter.com/articles/110250> to see how to add a phone number to your Twitter account.

6. Go to the tab **Keys and Access Tokens**, and click on **Create my access Token**:

Details

Settings

Keys and Access Tokens

Permissions

Application Settings

Keep the "Consumer Secret" a secret. This key should never be human-readable in your application.

Consumer Key (API Key)

Consumer Secret (API Secret)

Access Level

Read and write ([modify app permissions](#))

Owner

Owner ID

Application Actions

Regenerate Consumer Key and Secret

Change App Permissions

Your Access Token

You haven't authorized this application for your own account yet.

By creating your access token here, you will have everything you need to make API calls right away. The access token generated will be assigned your application's current permission level.

Token Actions

Create my access token

7. Your Consumer Key, Consumer Secret, Access Token and Access Token secret will be displayed. Copy them and used them to authenticate (you need them to authenticate the first time you create an account, and you won't be asked to enter them again).
